

# LAB 18

## MAKE ME AN ANGULAR APP

# INSTRUCTIONS

- Work in pairs in your teams
- Your app must include:
  - Multiple routes (at least 2)
    - One of your routes should be one of the following: ngPalindrome, ngFizzBuzz, or ngPrimes\*
  - At least 2 services:
    - One that works internally for you app
    - One that pulls data from an external source (e.g. Mashape, Weather, Flickr, etc. - Not Reddit)
  - At least 2 custom directives
  - Inject at least one external dependency (other than `ngRoute`)
  - Make use of ng-repeat

# NG\*

Enter a number: 15

The number 15 is Fizzy and Buzzy

- Sample output:
  - ngFizzBuzz - "The number 15 is Fizzy and Buzzy"
  - ngPalindrome - "Elephant is not a palindrome"
  - ngPrimes - "The prime factors of 23414 are 2, 23, and 509"
